

Three-Layer RPG Continuity Handover

For vibe-coding a web-based HTML continuity app for Windows Chrome and Android Chrome

Primary focus: Level 2 OG simulated table + Level 3 in-game Storm King's Thunder campaign

Purpose of this handover

This PDF is designed to be pasted, uploaded, or referenced in a new chat where the next task is to vibe-code a three-layer continuity app. It captures the logic, timeline, characters, state, boundaries, table-style corrections, and current scene anchors so the new chat can build an app without losing continuity.

Field	Value
Generated for	Josh / OG Josh / Alphie J. Roane continuity system
Artifact intent	Detailed handover and implementation brief for a browser-based HTML app
Layer 1 - OOG real user	Real Josh using ChatGPT; included only lightly
Layer 2 - OG simulated table	OG Josh, Marcus, Ben, Talia, Romi in Dubbo; included in depth
Layer 3 - IG in-game	Storm King's Thunder campaign; Goldenfields/Northfurrow's End; included in depth
Current Level 2 anchor	Saturday morning, 9 May 2026, 92 Lakeside Circuit, after the Friday dinner/spa/sleepover
Current Level 3 anchor	Late night at Northfurrow's End, Goldenfields, party asleep after Alphie's apology to Wren

1. Executive Summary

This continuity has three active layers. The app must let the user track and switch between them without mixing them up.

Layer	Name	Reality frame	Most important current state
Level 1	OOG real life	Josh using ChatGPT in the real world.	Minimal focus. Used mainly for current user requests and artifact creation.
Level 2	OG simulated table	Parallel-timeline Josh Parris in Dubbo with friends Marcus, Ben, Talia, Romi.	Friday night hosting has rolled into Saturday morning. Romi and Josh crossed a romantic line privately. D&D is at 1pm.
Level 3	IG in-game	The fictional D&D world inside Marcus's Storm King's Thunder campaign.	Party is at Northfurrow's End in Goldenfields. Alphie is asleep after repair with Wren. Attack has not yet begun.

The central design risk is layer bleed: facts from one layer accidentally becoming true in another. The app should therefore support explicit layer tags, date/time anchors, character ownership, and source status labels such as sourcebook-canon, table-canon, player-choice, and unresolved.

2. Non-Negotiable Continuity Rules

- Do not make choices for Josh's controlled characters. In Level 2, Josh controls OG Josh. In Level 3, Josh controls Alphie J. Roane. The narrator/DM may frame scenes, consequences, and NPC reactions, but Josh chooses his character's actions and words.
- Do not make choices for other players' PCs either. Marcus gives pressure, ambiguity, temptation, and trade-offs. Talia, Romi, and Ben decide what Wren, Kella, and Dorrin do.
- Separate DM-private source structure from player-facing table narration. Do not spoil attack triggers, monster routes, or encounter mechanics in Marcus's player-facing voice.
- Use "less prestige drama mode please" as the style correction switch. It means less polished dialogue, fewer perfect one-liners, more ordinary pauses, real awkwardness, and stronger consequences.
- Do not make Alphie/Josh the only flawed character. However, do not assign flaws to other PCs. Instead, let situations reveal flaws through player choice.
- When adapting published adventure text, clearly separate sourcebook-canon from table-canon extrapolation.
- Do not use alcohol as an automatic courage/romance escalation device without realistic guardrails: food, water, consent, transport/sleepover safety, and next-day consequences matter.

3. Layer 1 - OOG Real User Layer

This is the real-life user interacting with ChatGPT. It matters mainly because the new chat will receive prompts from the real user and may be asked to create artifacts, code, PDFs, or app features. Keep this layer light unless explicitly needed.

Field	Value
Current real-world model anchor	The wider conversation took place around early May 2026; system current date may differ from the fictional anchors.
User preference	Natural Australian English, concise by default, warm, honest, practical, emotionally attuned.
Avoid	Calling user mate; overexplaining; taking away player agency; turning scenes into excessive prestige drama.
Artifact goal in next chat	Vibe-code a web-based HTML app that manages the three layers and runs well on Windows Chrome and Android Chrome.

4. Layer 2 - OG Simulated Table Overview

Level 2 is a parallel-timeline social/D&D simulation. It is not the real user's life; it is a fictionalized OG Josh continuity with its own dates, house, job, friendships, relationships, and table dynamics.

Field	OG Josh value
Name	Josh Parris
Age	36
Status	Single, never married, no kids
Address	92 Lakeside Circuit, Dubbo NSW 2830
Cat	Bast, four-year-old grey tabby, RSPCA rescue, indoor-mostly
Vehicle	2022 Ford Ranger XLT through work; also a private ute in the full wealth dossier
Faith	Christian, attends Dubbo Presbyterian, plays piano on worship team, small group Wednesdays
ADHD	Present; managed by lifestyle rather than medication in this timeline
Main emotional trade-off	Lower family stress but loneliness is the cost.

4.1 OG Josh Work and Wealth Context

OG Josh's government job is not his whole financial reality. It provides rhythm, regional connection, and social structure. The fuller dossier reframed him as quietly wealthy with multiple income streams, a major inheritance, family wealth in the background, a game/app studio, and an AI startup.

Area	Details
Government role	Senior Stakeholder Engagement Coordinator - Western NSW Region, Department of Regional NSW; started early 2024.
Official package	About \$170k total package: \$145k base, super, maintained Ranger, phone/laptop allowance.

Current work status	Forced leave until mid-June 2026 due to leave balance cap.
Parris Tech Services	AI-automated game/app development studio with browser games, Roblox/Fortnite Creative contracts, small WoW work, tooling SaaS. Roughly \$20k/month net.
Currawong AI	Australian-sovereign AI startup for regulated industries; Josh is CTO-ish/product/architecture/regional-government relationship lead; 40% equity.
Inheritance	\$500k from great-uncle Mal landed this week; not fully emotionally processed.
Net worth	Approx. \$5.5m in the updated financial picture, much of it illiquid/paper/business equity.
Financial theme	Not survival risk. Drift risk. Deployment, meaning, structure, loneliness, generosity.

4.2 OG Josh House - 92 Lakeside Circuit

The house is a major Level 2 setting. It should not be treated merely as a rich-person flex. In the OG Josh manifesto it exists for hosting, friendship, community, and making loneliness less private.

Room/Area	Function in continuity
Master bedroom	Josh's bedroom. Romi later asks to sleep there with him after Friday night.
Guest bedroom	Proper made-up guest room; Ben uses a guest sleep space during the Friday sleepover.
Library	Floor-to-ceiling shelves, armchairs, reading lamp. Significant to Josh's identity and writing life.
Writing room	Private novel room, usually locked when guests stay. J.A. Roane pseudonym work lives here.
Study	Government work, Currawong AI work, whiteboard; later used for Dubbo-as-D&D setting brainstorming.
Rumpus / D&D room	Custom 6-person table, minis, terrain, RPG books, projector, whiteboard. The social heart of D&D hosting.
Kitchen / dining / family	High-end cooking and coffee setup; Friday dinner hub; later Saturday breakfast tour.
Patio / pool / spa	Night pool plunge, spa debrief, hospitality setting, romantic tension with Romi.

4.3 OG Josh Kitchen Setup

The kitchen became a Saturday morning character-reveal location. Josh overexplains equipment. Friends tease him. The kitchen is both genuinely useful and a symbol of over-capacity, over-hosting, and craft.

Category	Key items / continuity use
Coffee	Roasting Plant-style Javabot explanation; La Marzocco/lever espresso concept; grinders; pour-over kettle. Josh overexplains; Romi says no footnotes before breakfast.
Cooking	Molteni-style professional range, Gaggenau ovens,

	modular cooktop, powerful range hood.
Cold storage	Sub-Zero fridge, EuroCave wine storage, ice maker/nugget ice philosophy.
Cleaning	Miele dishwasher/washer/dryer; practical household competence.
Bench appliances	KitchenAid/Ankarsrum, Vitamix, Robot Coupe, Zojirushi, chamber vacuum sealer, etc.
Running joke	After all this gear, Talia asks whether they are having cereal for breakfast.

5. Layer 2 Social Cast

Person	Role	Current social/emotional position
Josh	Host, player of Alpie, wealthy/single/creative/biohacker/entrepreneur.	Trying to stop over-hosting and be loved without performing. Has strong chemistry with Romi.
Marcus	DM, 38, IT manager, married with two kids, Josh's best mate/godfather connection.	Not present at Friday hang due to family dinner. Receives encouragement video. Next D&D session at 1pm Saturday.
Ben	32, vet, single, quiet deep friend.	Stabiliser. Played tennis with Josh. Stayed over after Friday. Offers grounded feedback and water.
Talia	29, primary teacher, partnered, sharp humour.	Social pressure valve. Calls out too-intense moments. Came for dinner with dairy-free dessert; sleepover on couch/rumpus.
Romi	35, paralegal, divorced, worldly warmth, player of Kella.	Romantic interest for Josh. Direct boundary-holder. Stayed in Josh's room; they were consensually intimate. Tuesday coffee remains important.
Bast	Cat, grey tabby.	Judgemental roaming neutral. Socially powerful by doing almost nothing.

6. Level 2 Table/Campaign Calendar

Date	Session/Event	Notes
Sat 7 Mar 2026	Session 0	Storm King's Thunder campaign starts; table expectations established.
Sat 14 Mar 2026	Session 1	Early campaign play.
Sat 21 Mar 2026	Session 2	Early campaign play.
Sat 28 Mar 2026	Session 3	Nightstone/early arc progression.
Sat 4 Apr 2026	Session 4	Nightstone/Dripping Caves aftermath arc.
Sat 11 Apr 2026	Session 5	Zephyros/cloud tower progression

		likely underway.
Sat 18 Apr 2026	Session 6	Travel and roleplay.
Sat 25 Apr 2026	Session 7	Approach to Goldenfields context.
Sat 2 May 2026	Session 8	Goldenfields arrival, Miros/Rillix, Alphie night walk, next-day scenes, Wren apology.
Fri 8 May 2026	Non-campaign house hang	Dinner, games, pool, spa, Romi/Josh romance.
Sat 9 May 2026	Session 9 due at 1pm	Everyone slept over. Breakfast in progress. D&D later that day.

7. Level 2 Friday House Hang - Detailed Timeline

Time	Event	Continuity notes
5:30pm	Josh waits with red wine, tennis on Foxtel.	Prepared but trying not to over-host.
5:49pm	Ben arrives.	Brings snacks. Gets normal human tour. Helps make punch.
6:08pm	Talia arrives.	Dessert, tired from school. Quick tour, safe punch, teacher banter.
6:22pm	Romi arrives.	Work clothes, hungry, wants antisocial first ten minutes. Tour; reacts to house/library/D&D room.
6:30-7:15pm	Dinner.	Mediterranean-style meal; dairy-free; wizard punch and normal punch clearly labelled.
7:15-9:15pm	Cockroach Poker / dessert / Truth or Confession.	Banter, flirting, Josh admits loneliness, Romi challenges him to try less.
9:45-10:00pm	Telephone attempted.	Flirt game gets too suspicious; Talia bans it from escalating.
10:00pm	Pool plunge.	Ben enters fully clothed. Spare clothes distributed. Romi wears Josh's La Trobe shirt/board shorts.
10:15-10:45pm	Pool flirting and group splash chaos.	Romi/Josh deep-end moments; Talia/Ben splash war; chemistry grows.
11:15pm	Dubbo-as-D&D whiteboard in study.	Romi invents magistrate's clerk; indirect flirt via character-building; Ben eats dessert.
Midnight	Hide-and-seek.	Ben found in laundry. Romi hides in pantry. Pantry moment: Josh chooses Tuesday rather than kiss in pantry; Romi kisses cheek near mouth.
1:00am	Spa.	Tea, not punch. Quiet adult conversation. Romi/Josh knees touch under water. No performance.
1:35am	Sleep plan.	Ben and Talia settle into separate sleep spaces. Romi asks to sleep

		in Josh's room.
3:00am	Romi wakes and asks to kiss Josh.	Consent established. They become intimate privately until morning.
Sat morning	Morning after.	Romi wants a simple plan: no public announcement, Tuesday coffee still matters. Later morning kitchen/coffee explanation.

8. Level 2 Friday Hang - Key Relationship State

Josh + Romi current state

They have strong chemistry. They chose intimacy consensually overnight. Romi is not treating this as a casual nothing, but also not as instant relationship status. Tuesday coffee remains the sober, public, adult follow-up. The app should represent this as: romantic arc active; private intimacy occurred; status unresolved; coffee Tuesday planned; do not make it an automatic couple label.

Boundary / principle	Current expression
No pretending	Josh does not want to pretend nothing happened.
No announcement	Romi does not want a hallway declaration or breakfast-table performance.
Tuesday matters	Coffee on Tuesday, away from the house and without alcohol/hosting, is the real test.
Lead hallway part	Josh agreed to let Romi lead the public handling in the house.
Adults with consequences	D&D is at 1pm Saturday. They must function socially as a group.

9. Level 2 Current Scene Anchor

Resume point for OG layer

Saturday 9 May 2026, morning at 92 Lakeside Circuit. Josh, Romi, Ben, and Talia are awake or waking. Romi and Josh emerged from Josh's room/shower area and are trying to do normal without lying or announcing. Ben is trying to understand the coffee machine. Talia is on/near the couch with blanket energy. Josh began an elaborate kitchen/coffee tour and is about to cook a simple breakfast because D&D is at 1pm.

- Romi has said: Tuesday coffee still happens. Sober. Somewhere with bad lighting and other people.
- Josh has said he is happy for Romi to lead the public handling.
- Friends may infer what happened, but the realistic tone is awkward normality, not a dramatic confrontation.
- Ben and Talia are tired, amused, and likely to tease gently if the room gets too performative.
- Marcus is not at the house but will see them at D&D later, unless someone updates him first.

10. Level 2 Important Group Chat/Meta Notes

- The group sent Marcus a short encouragement video during Friday night. Talia, Ben, Romi, and Josh each gave about 20 seconds of appreciation. Marcus replied warmly and noted the feedback: fewer overly poetic NPCs, more moral complications, keep Oren messy, maps good. Josh accidentally said "sneganigans"; Marcus joked it may become canon.
- Romi previously warned Josh not to turn generosity into buying affection or funding everyone's hobby life.
- Ben and Talia repeatedly helped keep the night safe and grounded by encouraging water, dessert, and less intense games.
- The Friday hang developed into sleepover because people drank/swim/spa late; no one should drive if impaired.

11. Layer 3 - In-Game Storm King's Thunder Overview

Level 3 is the D&D story inside the Level 2 table. It is run by Marcus. Published source accuracy matters, but table-canon additions exist. The current location is Goldenfields, specifically Northfurrow's End.

Field	Value
Campaign	Storm King's Thunder
Likely Realms year	1491 DR, standard SKT timeline assumption
Current place	Northfurrow's End, Goldenfields
Current in-game time	Late night, roughly 10:30-11:30pm, after a long Goldenfields day.
Current party state	Asleep in shared room at Northfurrow's End after Alphie's quiet apology to Wren.
Next likely in-game move	Next morning unless Marcus triggers a night event. Attack timing/source structure must not be spoiled to players.

12. Level 3 Player Characters

Player	Character	Known current arc/status
Josh	Alphie J. Roane, human Divination Wizard, level 5	Hospitality/cider family wizard. Learned Levitate from Zephyros. Recently had heavy drinking/wandering/recon episode. Apologised to Wren. Must be steady.
Talia	Wren	Bard-ish slow-burn romantic interest for Alphie. Supported Miros with grief/Rillix. Accepted apology but trust dented.
Romi	Kella Darkhope	Practical, wary, possible Zhentarim-adjacent competence. Suspicious of Shalvus. Kinship/banter with Alphie, not romance.
Ben	Dorrin Stonebrook	Priest/steady martial-spiritual figure. Met Zi Liang and Darovik.

		Sees weak command discipline at Goldenfields.
--	--	---

13. Level 3 Special NPC Assignments

Player	Special NPC	Source starting location when encounter begins	Notes
Josh	Lifferlas	G6 grove of trees	Awakened tree, oldest living resident of Goldenfields. Not physically with Alpie unless moved in play.
Talia	Oren Yogilvy	G8 outside the inn	Halfling musician, fond of Goldengulp, messy and fun. Player should run him during battle.
Romi	Zi Liang	G7 Harvesthome Abbey	Acolyte of Chauntea, frustrated about weak defence leadership.
Ben	Miros Xelbrin	G8 inside the inn	Innkeeper, grieving after news of parents; reunited with Rillix.
Set aside	Naxene Drathkala	G8 stable house	Watchful Order/Lords' Alliance mage; unused special NPC unless Marcus needs her.
Set aside	Shalvus Martholio	G8 inside the inn	Zhentarim spy; source special NPC but not assigned to a player so far.

14. Level 3 Goldenfields Source-Canon Locations

Area	Source-canon summary	Current table use
G1 Gatehouse	Magnificent stone gatehouse carved with Chauntea imagery, arrow slits, inner/outer double doors, search for vermin/crop threats.	Party entered through here. Guards searched/processed visitors.
G2 Watch Posts	Parapets/pagodas/gongs/stairs; alarm depends on guards reaching gongs; wall 60ft outside, 20ft inside.	Alpie recon noted gong access routes and stair bottlenecks.
G3 Earth Mother's Bounty	Seed shop north of Chauntea statue, run by Sevembra Tumbleleaf, halfling druid/Emerald Enclave.	Alpie met Sevembra, offered cider toast, received seeds.
G4 Grain Towers	Squat stone towers storing grain.	Alpie identified as critical targets during night recon.

G5 Livestock Fields	Oxen/cattle and pens for sheep/chickens/turkeys/pigs; Shalvus is a new shepherd/Zhentarim spy.	Party met Shalvus. Alphie later observed table-canon suspicious night recon.
G6 Town	Concentric half-ring longhouses around central square; workers commoners; tree grove south of town has Lifferlas/treants.	Party moved through town; not yet fully met Lifferlas in-character.
G7 Harvesthome Abbey	Chauntea abbey, statues, stained glass, prayer bells, Darlow/Tilbee bears, Darovik, Zi Liang.	Dorrin met Zi and Darovik; bears appeared.
G8 Northfurrow's End	Three-story inn, stable house, Miros, Golden Gulp, performers, Oren, Naxene above stable house.	Central party base, Miros grief scene, housebox/lodging/baths/table-canon Lysa.
G9 Goldengulp Brewery / Dragon's Spire	Brewery, warehouse, Captain Strog Thunderblade HQ, bronze dragon history.	Not yet properly explored. Important future source location.
G10 Freshwater Spring	Natural spring and small lake feeding rice paddies; frogs at night.	Can be used for local colour and tactics.
G11 Rice Paddies	Water-filled furrows for rice.	Not yet explored.
G12 Vegetable Gardens	Carrots, onions, squash, tomatoes, potatoes, radishes, etc.	Not yet explored.
G13 Wheat Fields	Nearly half of tilled earth; important attack terrain.	Alphie mapped as tactically important.
G14 Herb Gardens	Western wall herb gardens with druids/cottages.	Not yet explored.
G15 Orange Orchard	Orange trees northwest of wheat fields.	Potential Roane/fruit trade resonance.
G16 Apple Orchard	Famous ageless tart apple orchard; young treants guard it.	Alphie/Wren dream used apple orchard imagery; source-canon orchard exists.
G17 Corn Field	Tall corn by end of summer.	Not yet explored.
G18 Barley Field	Feeds Goldengulp production and export.	Connects to brewery/economy.
G19 Hops Field	Hops for beer; workers live nearby.	Not yet explored.
G20 Pumpkin Patch	Large firm pumpkins, worker house nearby.	Not yet explored.

15. Level 3 Goldenfields Mood Correction

Source-correct mood

Goldenfields should not be broadly anxious. The earlier giant probe has not changed the public mood much because residents place great stock in the strength of the outer defences and militia. The settlement feels confident, routine, busy, and maybe dangerously complacent.

- Individuals can be worried: Zi Liang, perhaps Dorrin, Kella, Alphie, some scouts or workers.
- The public mood is not fear. It is trust in walls, food systems, militia, and routine.

- Do not have everyone act like they know an attack is imminent unless they learn it in play.

16. Level 3 Table-Canon Additions

These are valid continuity, but they are not direct published text. The app should tag them as table-canon.

Table-canon element	Status / caution
Lysa	Northfurrow's End server/staff member, practical and discreet. Not sourcebook-canon, but now important table NPC.
White Horse Blue-Mane stable bay	Stable organization label used for the party's horses/wagon.
Exact room/meal/bath prices	Table-canon economics. Useful for accounting, not source text.
Roane family connection to Goldenfields	Plausible table-canon: Uncle Alfred Roane may know Darovik/Goldenfields hospitality/agriculture people.
Sevembra having met/heard of Alfred Roane	Plausible table-canon; do not overstate as source.
Shalvus night parchment/sightline recon	Extrapolated from his spy assignment; useful but not source text.
Alphie's Goldenfields tactical advantage	Earned from night recon and high rolls; table mechanical benefit.
Miros/Rillix grief scene	Quest-linked story beat from Nightstone; emotionally important, table-driven.

17. Level 3 Current Party Money and Assets

Category	Amount / item	Notes
Party pool	39 gp, 9 sp	After room, supper, hot baths, lock deposit.
Alphie personal coin	0 gp	Broke due to horse debt/restoration duties.
Wren personal	22 gp, 5 sp	From last clean tally.
Dorrin personal	31 gp	From last clean tally.
Kella personal	14 gp, 8 sp, 5 cp	From last clean tally.
Total liquid	108 gp, 2 sp, 5 cp	Party pool + known personal funds.
Housebox	2 x 100 gp gems + Nightstone restitution note	Stored at Northfurrow's End under Alphie Roane - Nightstone restitution items.
Potion	Potion of Heroism	Held by Dorrin.
Trade goods	2 Roane cider casks + 6 sample bottles	Cider casks in wagon/stables; samples brought for Miros/trade.
Gear	Dwarf chain mail and helm	Nightstone chest/safekeeping/salvage asset.

18. Level 3 Horses, Wagon, and Stables

Item	Status
------	--------

Sace	Horse, stabled at White Horse Blue-Mane.
Marrow	Horse, stabled at White Horse Blue-Mane.
Vesper	Kella's horse name locked as Vesper; stabled at White Horse Blue-Mane.
Wagon	Under cover, canvas down, casks lashed.
Stable routine	Alphie thoroughly watered, cooled, brushed, checked hooves/legs/harness, delayed oats, and asked stablehand to check cask lashings.
Stable payment	Already paid earlier from party money/Kella interaction; exact prior accounting incorporated into party pool state.

19. Level 3 Key Recent In-Game Timeline

In-game sequence	What happened
Zephyros tower	Alphie learned Levitate, levitated companions/NPCs playfully, thanked Zephyros, gave family address, joked about giant cider tree.
Goldenfields arrival	Party entered gate, had source-corrections around gatehouse/search/mood, met Sevembra at Earth Mother's Bounty.
Shalvus first contact	Alphie asked Shalvus for directions to Miros; Kella/Romi nat 20 read identified concern; Alphie possibly poked a bear socially.
Stables	Alphie and Kella settled horses/wagon. Wren/Dorrin took Rillix/news inside.
Miros grief	Miros received news of his parents' deaths from Nightstone and reunited with Rillix. Clean hour, grief held respectfully.
Inn logistics	Lysa handled shared room, supper, hot baths, lock deposit, housebox for restitution gems/note.
Alphie drinking episode	Secret drinks, levitate escape, cider from wagon, night walk. Eventually turned into recon and emotional spill to Lysa.
Night recon	Alphie mapped Goldenfields, earned tactical advantage, noticed alarm/gong bottleneck, observed Shalvus suspiciously near livestock fields.
Breakfast repair	Alphie cooked Nightstone breakfast round two, told party recon. Wren named hurt/trust dent. Quiet signal established: "I need quiet".
Spotlight correction	Marcus gave Wren/Oren, Kella/Shalvus, and Dorrin/Zi/Darovik proactive scenes not centred on Alphie.
Alphie long rest	Alphie slept to clear exhaustion while others had scenes.
Wren apology	Alphie woke, asked Wren downstairs, apologised. Wren accepted; trust dented, not broken. Asked for steadiness.
Bookmark 9	Everyone asleep in shared room at Northfurrow's End after apology; Alphie dreams of Wren in apple orchard.

20. Level 3 Character Relationship States

Relationship	Current state
Alphie + Wren	Slow-burn romantic arc. Wren cares, accepted apology, but trust dented by drinking/disappearing. She wants steadiness, not grand gestures.
Alphie + Kella	Kinship/banter/practical trust. Kella helped with deposit/stables. No romance. She will call him out.
Alphie + Dorrin	Spiritual/practical party trust. Dorrin notices but does not over-comment. Rest is medicine.
Wren + Miros	Wren helped deliver grief and Rillix. Not to become Wren's endless emotional burden.
Kella + Shalvus	Suspicion and possible mirror/foil. Player Romi chooses how Kella responds. Marcus should not force spy identity conflict.
Dorrin + Zi Liang	Shared concern about Goldenfields readiness. Zi is abrasive/right; Dorrin may support without taking over.
Dorrin + Darovik	Respectful but concerned. Darovik kind/conflict-avoidant; Dorrin sees that kindness is not preparation.

21. Level 3 Style Corrections Locked

Table signal

If narration drifts too poetic, too omniscient, too Alphie-centred, or too emotionally articulate, Josh may say: "less prestige drama mode please." The system should immediately correct tone.

Problem to avoid	Corrective behaviour
Everyone speaks in perfect speeches	Use shorter, messier, more ordinary dialogue. People pause, joke badly, miss things, or say nothing.
Everyone comments on every beat	Only present/involved characters speak. Let silence happen.
Other PCs are flawless	Do not assign flaws, but give pressure that lets players reveal flaws through choice.
Alphie is narrative centre of gravity	Give proactive scenes to Wren/Kella/Dorrin and let their players lead.
DM spoils source structure	Keep encounter routes, triggers, and monster setup behind the screen.
NPCs know too much	NPCs only know what they reasonably saw, heard, or were told.
No consequences	Apply normal 5e and social consequences: exhaustion, trust dents, missed info, costs, NPC reactions.

22. Level 3 Source Accuracy Warnings

- Do not reveal that Oren source-canon spots the attackers or the structure of the Goldenfields attack in player-facing narration unless it happens in play.
- Do not imply Goldenfields is scared. It is confident/complacent.
- Strog Thunderblade and Dragon's Spire matter but should be discovered naturally by Dorrin/Zi/Darovik or public knowledge, not spoiled as "the reason the attack succeeds".
- Darlow and Tilbee are old black bears at Harvesthome Abbey, mooching food and posing no danger. Use if abbey scenes continue.
- Naxene Drathkala lives above/near the stable house. She is a Watchful Order/Lords' Alliance attaché. She has not been meaningfully met yet.
- The special NPC handout technically happens when the attack begins; this table handed them out early for prep. Keep start locations source-correct later.

23. App Design Handover - Goal

The next chat will vibe-code a web-based HTML app. The app should operate as a three-layer continuity dashboard, session manager, timeline, character tracker, and prompt generator. It should work well on Windows Chrome and Android Chrome, likely as a single-file or lightweight static app initially.

Requirement	Description
Platform	Web-based HTML/CSS/JS; no backend required for MVP; localStorage persistence desirable.
Devices	Windows Chrome desktop and Android Chrome mobile.
Core UX	Three layer tabs: OOG, OG, IG. The OG and IG layers need the richest detail.
Data model	Scenes, characters, timelines, relationships, assets, money, rules/corrections, bookmarks, prompts.
Continuity safety	Prevent layer bleed by requiring every fact to have a layer and canon status.
Resume support	Generate clean resume prompts for new chat windows.
Audit mode	Show warnings: source spoiler risk, prestige drama drift, player agency violation, NPC omniscience, untagged fact.

24. App Suggested Information Architecture

Screen / Tab	Purpose
Home / Dashboard	Current layer states, next likely scene, quick resume prompt, unresolved issues.
Layer Switcher	Prominent OOG / OG / IG tabs with colour-coding and current date/time for each.
Timeline	Chronological events per layer, filterable by character, session, date, canon status.
Characters	Profiles for Josh/Romi/Ben/Talia/Marcus/Bast and Alphie/Wren/Kella/Dorrin/NPCs.

Relationships	Romantic/friendship/trust arcs, boundaries, unresolved tension, <u>private/public</u> knowledge.
Scenes	Scene cards with title, time, location, participants, summary, status, next prompts.
Assets & Money	IG party coin/items; OG property/resources; avoid mixing.
Rules & Corrections	Less prestige drama, agency rules, source accuracy, alcohol/consent safety, table style.
Prompt Builder	Generate prompts for continuing a scene, recapping, auditing, or coding.
Sourcebook Guard	List source-canon vs table-canon elements; warning not to spoil DM-private info.

25. App MVP Data Schema

The MVP can use plain JavaScript objects stored in localStorage. A future version could export/import JSON. Suggested schema:

```
{
  "layers": [
    {"id":"oog", "name":"Level 1 - OOG Real Life", "focus":"low"},
    {"id":"og", "name":"Level 2 - OG Simulated Table", "focus":"high"},
    {"id":"ig", "name":"Level 3 - In Game", "focus":"high"}
  ],
  "characters": [{
    "id":"naomi", "layer":"og", "name":"Romi", "type":"player/friend",
    "privacy":"table-public", "summary":"Paralegal, divorced, player of Kella, romantic arc with OG Josh."
  }],
  "scenes": [{
    "id":"og-fri-spa", "layer":"og", "date":"2026-05-09", "time":"01:10",
    "title":"Spa diplomacy summit", "location":"92 Lakeside Circuit spa",
    "participants":["josh-og","naomi","ben","talía"], "status":"complete",
    "canonStatus":"table-canon", "summary":"Quiet spa, tea, knees touch, chemistry contained."
  }],
  "facts": [{
    "id":"ig-goldenfields-mood", "layer":"ig", "canonStatus":"source-canon",
    "visibility":"player-facing", "text":"Goldenfields public mood is confident/complacent, not openly anxious."
  }],
  "relationships": [{
    "id":"og-josh-naomi", "layer":"og", "people":["josh-og","naomi"],
    "status":"romantic tension active; intimacy occurred; Tuesday coffee planned",
    "boundaries":["No public announcement before conversation", "Tuesday sober coffee matters"]
  }],
  "bookmarks": [{"id":"bookmark-9", "layer":"ig", "title":"Goldenfields night settled", "resumePrompt":"..."}]
}
```

26. App Interaction Requirements

- Each scene card should display: layer, date/time, location, participants, summary, current state, next likely actions, and unresolved threads.
- Every fact should have a canon status: source-canon, table-canon, player-choice, inferred, unresolved, DM-private, or retconned.
- The app should support a "Generate Resume Prompt" button that composes a concise handover for the selected layer or scene.
- The app should support "Audit Mode" with checkboxes: player agency, NPC knowledge, source spoilers, prestige-drama drift, alcohol/consent safety, layer bleed.

- The app should have mobile-friendly cards, sticky layer switcher, collapsible sections, and a search/filter bar.
- Use simple CSS, large touch targets, dark mode, and readable typography. This is meant to be used on Android Chrome while roleplaying.

27. Sample Resume Prompts for the New App

27.1 Resume OG Level 2 - Saturday Morning After Friday Hang

Prompt

Resume Level 2 OG simulated table. It is Saturday 9 May 2026 morning at 92 Lakeside Circuit, Dubbo. Josh, Romi, Ben, and Talia stayed over after Friday dinner, games, pool, spa, and late-night sleepover. Romi and Josh were privately intimate overnight and are not pretending it did not happen, but Romi wants no hallway declaration or breakfast-table performance. Tuesday sober coffee remains the real follow-up. Ben and Talia are awake/tired and likely to tease gently if Josh overperforms. Marcus was not at the hang and D&D is at 1pm today. Josh has started explaining the Javabot/coffee machine and kitchen gear, and Romi has said to try less and cook breakfast. Continue realistically, with ordinary awkwardness, humour, and boundaries.

27.2 Resume IG Level 3 - Goldenfields Bookmark 9

Prompt

Resume Level 3 in-game Storm King's Thunder from Bookmark 9. Everyone is asleep in the shared room at Northfurrow's End after Alphie's apology to Wren. Alphie has cleared exhaustion. Goldenfields is confident and routine, not openly tense. The party has useful but incomplete information about Shalvus. Dorrin has met Zi and Darovik; Wren has supported Miros and met Oren; Kella is watching Shalvus. Special NPCs assigned: Josh/Lifferlas, Talia/Oren, Romi/Zi Liang, Ben/Miros. Keep source spoilers DM-private. Continue with the next morning unless Marcus has a night event.

27.3 Style Correction Prompt

Prompt

Less prestige drama mode please: use realistic table pacing, shorter dialogue, awkward pauses, fewer perfect one-liners, no omniscient NPC knowledge, no taking away player agency, and meaningful but not melodramatic consequences.

28. Implementation Prompt for Vibe-Coding Chat

The next chat can use the following prompt to begin coding immediately:

Build a single-file web app in HTML/CSS/JavaScript for tracking a three-layer RPG continuity system.

Layers:

1. OOG real user - low detail.
2. OG simulated table - high detail. Current anchor: Saturday 9 May 2026 morning at 92 Lakeside Circuit, Dubbo, after Friday dinner/games/pool/spa/sleepover. Josh and Romi were privately intimate and Tuesday coffee remains planned. D&D is at 1pm.
3. IG in-game - high detail. Current anchor: Storm King's Thunder at Northfurrow's End, Goldenfields, late night after Alphie's apology to Wren; party asleep; Bookmark 9.

App requirements:

- Responsive for Windows Chrome and Android Chrome.
- Dark mode, large touch targets, collapsible cards.

- Data stored in localStorage with export/import JSON.
- Tabs for Dashboard, Timeline, Characters, Relationships, Scenes, Assets, Rules, Prompt Builder, Audit Mode.
- Every fact/scene must have layer and canonStatus: source-canon, table-canon, player-choice, inferred, unresolved, retconned, DM-private.
- Include seeded data from this handover PDF.
- Include audit warnings for player agency violation, source spoiler risk, prestige drama drift, NPC omniscience, layer bleed, and unsafe alcohol/consent escalation.
- Include a Generate Resume Prompt button for current OG and IG states.
- Do not use frameworks for MVP. Plain HTML/CSS/JS is fine.

29. Current Open Threads to Track

Layer	Thread	Status / next action
OG	Josh/Romi Tuesday coffee	Planned. Needs to remain sober, public-ish, no performance. Major relationship follow-up.
OG	Saturday D&D after sleepover	Everyone may be tired. Marcus may notice vibes. Maintain group friendship health.
OG	Josh hosting / housemate idea	Romi offered friend-level common-sense advice; use proper tenancy channels if pursued.
OG	Josh inheritance / Uncle Mal grief	Not processed. Potential future vulnerable coffee with Marcus/Lucas.
OG	Currawong/Parris Tech/gov job drift	Forced leave could trigger life planning. Do not flatten into money wish fulfilment.
IG	Goldenfields attack	DM-private source structure; players should not know trigger/routes ahead of play.
IG	Shalvus suspicion	Alphie/Kella have concerns, no public proof. Handle carefully.
IG	Wren trust dent	Alphie needs steadiness, not grand repair.
IG	Dorrin/Zi/Darovik defence concerns	Pressure point for next day or attack response.
IG	Lifferlas introduction	Josh's special NPC starts in grove; not yet personally roleplayed deeply.

30. Final Continuity Snapshot

If the new chat remembers only one thing: this continuity is about three nested layers of story and choice. The most important craft discipline is preserving agency while keeping timelines, relationships, and canon statuses clear.

One-line OG snapshot

Saturday morning after a wild but bounded Friday hang: Josh and Romi have crossed into a private

romantic/intimate arc, but Tuesday coffee and group normality matter. Breakfast and D&D at 1pm are next.

One-line IG snapshot

Goldenfields appears safe and confident at night, but the party has seen cracks: Shalvus, weak leadership, complacency, and source-canon danger behind the screen.

One-line app snapshot

Build a continuity dashboard that can switch layers, prevent bleed, generate resume prompts, and flag style/source/agency issues.
